R28 fixed4000 native DEV: four clips, two training seeds
CHARB adaptation
MSE adaptation
RGB PSNR (dB; higher is better)
Temporal residual error (0-255; lower is better)
Small hollow: each seed. Large filled: two-seed mean. Arrow: same-weight current to causal.
Flow/state cost is additional; phone latency is unmeasured. Per-seed screening is reported separately.
Plain raw
Plain + post .5
R26 pre/MSE current + post .5
R28 current raw (single frame)
R28 current + post .5
R28 causal raw (flow + state)
